

Spark Series Cabinets

Nitrotel Spark Series offer a select line of cabinet solutions that support and protect network devices, rack-mount servers and other applications in telecommunication equipment rooms, data centers and enterprise cabling applications, while providing an optimized space utilization.

KEY FEATURES AND BENEFITS

- Wide range of cabinets designs and industry-standard sizes available for specific thermal applications.
- Two configurations support front-to-rear airflow or noise reduction.
- Innovative vertical split side panels provide superior access to network devices and cabling.
- Fully compatible with 19" rack-mount equipment.
- Exclusive Flat Pack maximizes space utilization for transportation and storage.

Spark Series Cabinets

Available in a comprehensive set of industry-standard sizes, Spark Series Cabinets features two configurations that meet most application requirements:

- 1. Spark Network cabinets with shatter-proof glass front doors and solid rear doors, provides an ideal noise control for structured cabling systems in office environments, call centers and computer rooms, while they can also be deployed in small and medium-size data centers.
- 2. Spark Server cabinets with perforated front and rear doors allow an exceptional front-to-rear airflow for hot aisle/cold aisle applications in any medium or large size data center. Honeycomb style perforated doors provide maximum exhaust of hot air away from the cabinet to minimize operating costs.

Both configurations feature vertical split side panels for comfortable easy access to the installed devices, cable openings in the top panels that are large enough for high-amperage cables, bottom plates with sliding cable entry paths to block dust inlet and silk-screened adjustable mounting rails to easily count Umarking from top to down/down to top.

SPECIFICATIONS

31 ECH ICATIONS			
	Spark Network	Spark Server	
	Welded front and rear monoblock steel frames, Increase high rigidity		
	Silk-screen equipment mounting rails, two pairs		
Includes	4 fans module. Noise 46db, Air Flow 138/162 m ³ /Hr 82/95 CFM		
	Grounding/bonding system and ground lug		
	Leveling feet	Leveling feet and casters	
Equipment Space	See Height, Width and Depth tables up	nder Ordering Information/Dimensions	
	Up to 3000 lb (1360 kg) static load rating to support high-density applications		
Load Capacity	and multiple blade servers		
	EN 61587 -1:2012 Mechanical Structures for Electronic Equipment, IEC 197-		
	1, 19" Mounting, IEC 297-2 Overall Cabinet Dimensions, ISO 14001, EIA-		
Certifications	310-E compliant, ISO 9001-2008, TSE certificate, RoHS Compliant.		
	UL Listed E486214		
Structure Material	Steel frame, rails, side panels, bottom plate and roof panel.		
	Electrostatic powder coat paint on frame, doors, bottom plate, roof panel and		
Finish	side panels in Black RAL 9005 or Gray RAL 7035		
Environment	For indoor use only, in environmentally controlled areas, not harsh		
	environments.		
	Protection index: IP30 According to EN 61587-1/IEC 60529		
Construction	Welded/bolted frame		
CONSTRUCTION	Mounting rails bolt to frame		
Doors/Lock Kits	Tempered glass front door	Perforated front door	
	Solid rear door	Choice of solid or double perforated	
		rear door	
	Shatter-proof glass front door	Perforated area is 80% or 63% open	
	Solid rear door includes a barrel lock	Double rear door includes 3 points	
	lock system		
	Front door opens to 120°		
	Rear door opens to 120°	Rear double door opens to 120°	
	Hinge pins allow easy removal during maintenance		
	Reversible to open from the right or left, must change swing lock position		
	Interchangeable front or rear		
	Swing handle with keyed lock		
Side Panels	Solid, two-piece panels (vertical split design)		
	Recessed spring-loaded latch with barrel lock, keyed to match doors		
T D .	anels with cable openings and/or perforations available upon client request		
Top Panel	Standard panel is one-piece solid panel. Top panel shall be compatible with		
	4-fans cooling unit for D: 600/800mm cabinets and 6-fans cooling unit for D:		
	1000mm or deeper. Cutout opening is 300 mm x 56mm, wide enough for large amperage cables		
Bottom Panel	Standard panel is one-piece solid panel. Panel shall have sliding cable entry paths with dimensions 300mm x 125mm (1ea for 600mm x 600mm, 2ea		
Bollotti Fatiei			
	600mm x 800mm and 600mm x 1000mm)		
	Side panels and doors are electrically bonded to the cabinet frame		
Grounding/Bonding	Optional copper grounding bar for mounting rails upon customer request		
Equipment Support	Two pairs of mounting rails		
Equipment oupport	Adjustable depth, horizontal joint rails front-to-back		
	44.45mm U spacing, silk-screen market and number on mounting rails		
	EIA-310-E Universal 15.9mm-15.9mm-12.7mm vertical hole spacing		
	Square-punched mounting holes accept standard cage nuts		
	Square-punched mounting noies accept standard cage nuts		

Spark Series knock-down cabinets come in a compact flat-pack design which allows an easier handling of the cabinets into places with difficult access, such as halls, narrow entrances, stairs or elevator doors.

Create a cabinet solution that fits your needs by selecting Nitrotel compatible shelves, PDUs and cable management accesories. Contact Nitrotel Technical Support for configuration assistance.

Spark Series Cabinets

Front Door

The front door is designed to provide security with lock mechanism and aesthetic view together. Spark series network cabinets have full-length smoked and shatter proof glass front door with left & right frames, while Spark series server cabinets have 80% perforated front door. Both options easily rotate to the left or right directions by special spring hinge. 3-points and single point locking systems are available upon customer requirements.

Side Panel

Solid metal side panels offer easy access with lockable and removable structure. Completed with 2 pcs of sliding latches and 1 pc barrel lock.

Bottom Plate

Bottom plate provides easy cable management with its large internal volume cable entry path with sliding cover 300x125mm (2 cable entry paths for depth: 800mm & 1000mm cabinets)

Rear Door

Single opening rear door with spring hinge and barrel lock for network cabinet & double opening rear door with 3-points locking system for server cabinets.

Front and rear welded frames

Welded main carrier frames provide an excellent robustness for a comfortable storage. Each frame has a total of 24 folds, which increases structural stability. Spark series rack cabinets provides a safe housing for your network. Its steel construction supports a high load carrying capacity up to 1360kg

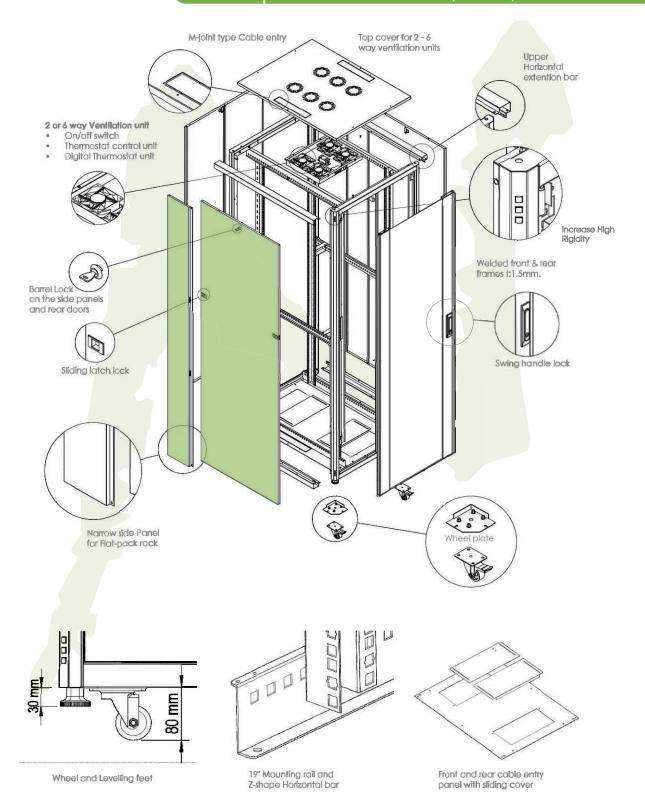

19 " Mounting Angles

The vertical mounting rails are adjustable throughout the entire depth of the cabinet and have very high carrying capacity with 1.5mm thickness. Silk-screen mounting rails are providing ability to count U-Marking from top to down & down to up for easy device installation

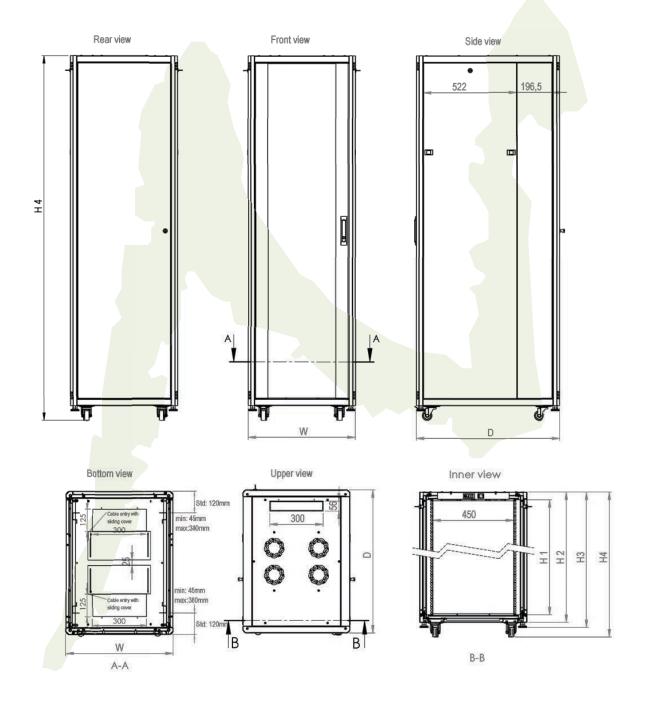

Spark Series Cabinets D:800, D:1000, D:1100 & D:1200

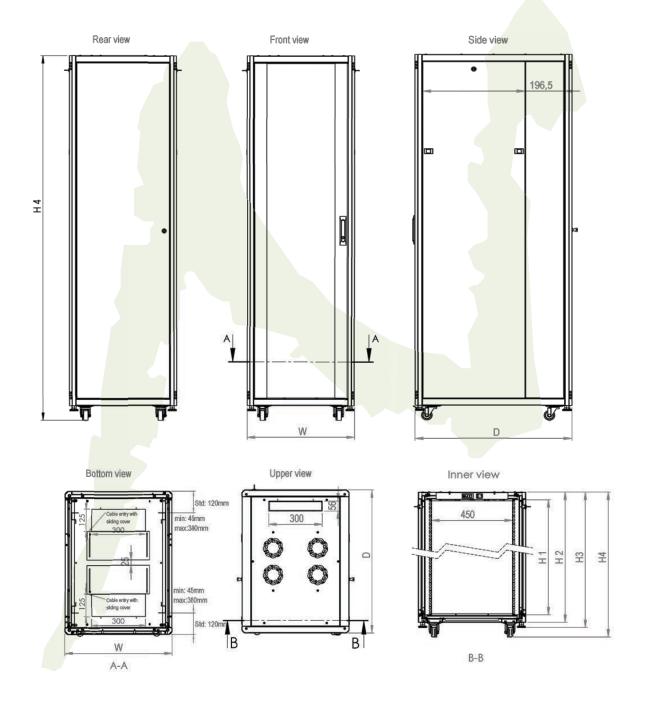

Spark Cabinet: W:600 - D:800

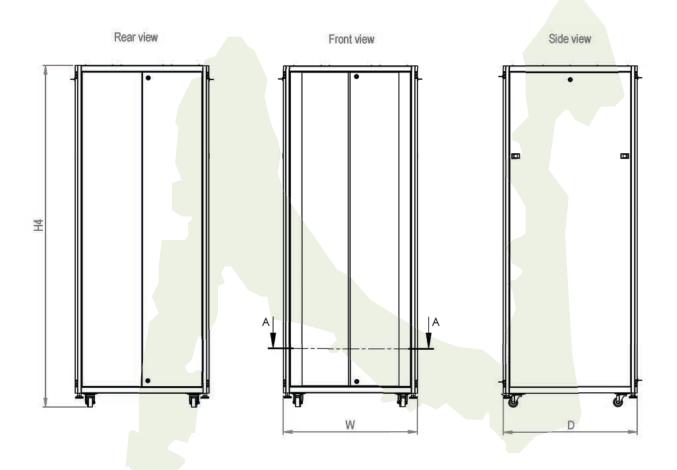

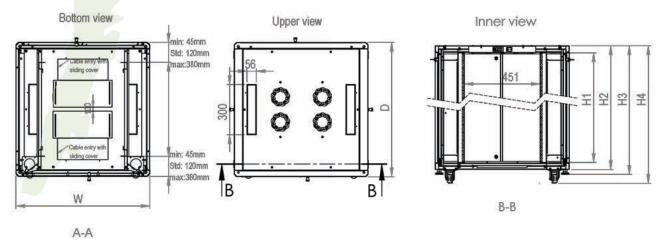

Spark Cabinet: W:600 - D:1000

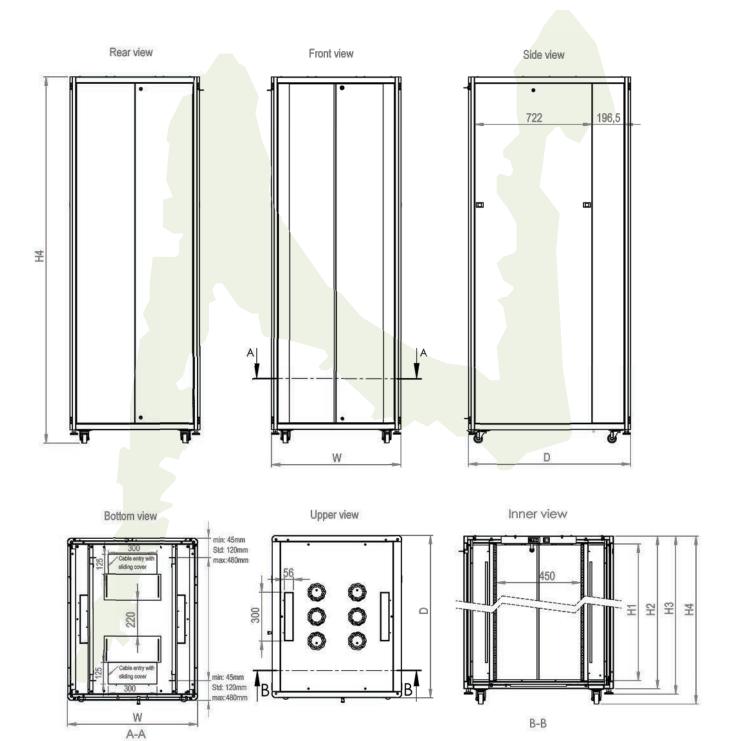

Spark Cabinet: W:800 - D:800

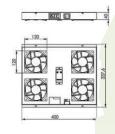

Spark Cabinet: W:800 - D:1000

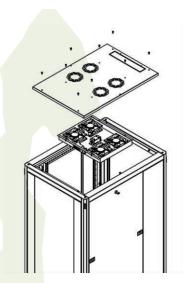

Spark Series Cabinets

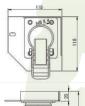

Quick-change fan trays that can be accessed without removing the cabling or the device from the rack

Spark serie's roof panel has been designed for ventilation module which can be detached by removing 4 pcs screws from the top in case of maintenance or replacement needs.

Standards: ISO 9001, CE (89/336/EEC EMC, 73/23/EEC LVD 2006/95/EC), RoHS", Noise 46db , Air FlowM3/Hr 138/162 CFM 82/95.

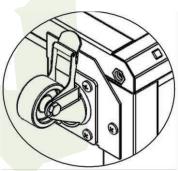

CASTER SET & LEVELLING FEETS			
ITEM	DESCRIPTION	INCLUDED IN:	
NTCFB30	Spark cabinet castor set of 2 pcs. lockable and rotable	Server cabinets	
NTCF30	Spark cabinet castor set of 2 pcs. rotable	Server cabinets	
NTLFM10	Levelling feet for cabinets (M10)	Server & Network cabinets	

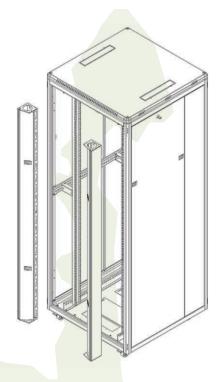

Spark Series Cabinets

Vertical cable management panel

Vertical cable management panel is designed for higher density cabling and connectivity system applications and also offers ease, density, availability, affordability and scalability together.

- Compatible with only width: 800mm rack cabinets (included)
- The vertical cable management panels are adjustable throughout the entire depth of the cabinet with mounting rails.
- Openings between fingers align with each U on the mounting rear
- Hinged cover included with managers, cover snaps closed to secure cables.
- Material: Steel panels, plastic guides and latches.
- Finish: Black or Grey; latches are black.
- Plastic finger type cable managers available upon request.

This well-engineered cable management system offers you a high level of versatility and flexibility for routing and organizing high density cable bundles, KVM and power cables.

Harmonization system codes-HS code

- 8538.10.00.00.00: Rack cabinet without accessories
- 85.37.10.99.00.19: Rack cabinet with accessories

Type of shipping

Assemble/Flat-pack

Load carrying capacity

1360kg/3000lbs

Surface treatment

On flat metal surfaces, there must be 85±5 micron paint thickness and must be tested according to IEC 60068-2-1, IEC 60068-2-2, IEC 60068-2-30, IEC 60068-2-42, IEC 60068-2-43, IEC 60068-2-49, IEC 60068-2-11

Standard color

Ral: 7035 Light gray/Ral: 9005 Black

Shipment configuration

- Front door with glass or perforations 1 set
- Reardoor 1ea
- Side panel 2pcs (D: 600mm) or 4 pcs (D: 800 & 1000mm)
- Bottom extension parts 2 pcs
- Upper extension parts 2pcs
- Welded metal frame 2pcs
- C-type rails 2pcs
- 19inch Mounting rail 4pcs
- Bottom plate 1ea
- Roof panel 1ea
- Grounding wire set 1ea
- Screwset 1set
- Swing handle lock 1ea
- Leveling feet 1set 4pcs
- Casters 1set 4pcs (server cabinets only)

Packaging

- Wooden pallet 1 ea (ISPM heat treated application)
- Stretch wrapping
- Cardboard
- Plastic strip
- Product label
