

PRODUCT DATA SHEET

EngineerPro® Shielded Modular Patch Panel, 24/48-port

Nitrotel's Engineer 24/48-port, 1 or 2U shielded modular panel design provides a best-in-class alien crosstalk (AXT) suppression and excellent protection against Electromagnetic Interference (EMI) and Radio Frequency Interference (RFI). These horizontal modular panels will accommodate 24 or 24 EngineerCat5e, Cat6 or Cat6A shielded keystone Jacks. Includes rear cable management bar and mounting accessories.

Features:

- Standard density 1U 24-port, 2U 48-port.
- Exclusive design for maximum alien crosstalk suppression.
- Convenient rear cable management bar to facilitate proper bend radius of cables.
- Compatible with standard 19" distribution racks.
- Stainless steel maintains consistent ground path between connector and panel.
- Compatible with all EngineerPro® shielded connectors.
